HAYDELL INDUSTRIES

ADVANCING SYSTEMS & SOLUTIONS IN COATINGS TECHNOLOGY

PRESENTS
NITROGEN
TECHNOLOGIES

Nitrogen Technologies offers quantifiable advantages not possible with compressed air with no change in equipment, processes and coatings.

>> Pure, Contaminant-Free Fluid Carrier

>> Zero Moisture Content

>> Polarity Control Measurably Increases Transfer Efficiency

>> Polarized Nitrogen Eliminates Static – Minimal Over Spray – Maximum Adhesion

>> Heated Nitrogen Lowers Viscosity – Gain Absolute Control of Fluid Carrier Temps

>> Significantly Reduces and Potentially Eliminates VOC & HAP Laden Reducers

>> Revolutionizes Powder Delivery

Without Changing Your Spray Equipment

Without Changing Your Process

Without Changing Your Coating

Greatly Improves Quality of Finish

Sets New Standard for Transfer Efficiency

Lowers Output of VOC's and HAP's

Nitrogen Technology is a Zero Sum Improvement to Existing Processes

Saves Time, Money and Improves End Results...

US & INTERNATIONAL PATENT PENDING

ULTRATECH
SPRAY

UltraTech Spray Generators Offer Purified Fluid Carrier with Positive or Negative Polarity that can be Heated to 176 Degrees in an Intrinsically Safe Cabinet

PROTECH
SPRAY

ProTech Spray Generators Offer Purified Fluid Carrier with Positive or Negative Polarity that can be Heated to 176 Degrees

NITROTECH
SPRAY

NitroTech Spray Generators Offer Purified Fluid Carrier with Positive or Negative Polarity
